thanks Jenny, I'll look forward to your comments and that type of language would be good to put into a paragraph

Re: Oregon NPS/319 annual progress letter DRAFT 

Hi Rick,

I'll look this over and send my comments by tomorrow. Just generally, talking with Don and Alan Henning and thinking about our meeting, I think a couple of good targets for the coming year are to support DEQ in their approach to integrate their water programs. We could do this in 319 by prioritizing a candidate watershed for NPS implementation (includes developing a watershed plan), leveraging our resources within that watershed, and setting a long-term strategy that will result in measurably improved environmental quality. Generally speaking, Don and I are also going to aim for regular communication, including potential items like the tour or a workshop.

I'm spending this week reviewing the 319 workplans. You're right, there are a lot of them! Attached below are a draft of the notes from the meeting, mostly compiled by Don Yon. I think he was supposed to send this to everyone this week.

Subject Oregon NPS/319 annual progress letter DRAFT

here is an internal-only draft of the nonpoint source/319 annual review (i.e. "satisfactory progress" under 319(h)) letter for Oregon based largely on the NPS annual report ODEQ submitted. It's fairly long but the beginning provides context, and then Dave I'd direct your look to the "Forestry" and "CZARA" sections, pages 5 and 6 please, in particular to see how this language may be further couched. Jenny also if you have further thoughts particularly in relation to our 319/TMDL and coordination efforts with DEQ. I've tried to stress more our partnership with DEQ this year while at same time still hitting on some of the areas to improve (prioritizing 319 \$, reporting, showing WQ results etc).

It would be good to get this out next week, please provide any comments (I'm avoiding that Word tracking changes stuff, but perhaps otherwise please let me know). There may need to be further edits but hopefully a net decrease in length. thanks-

Mike, Dave, just a fyi, this one coming up for signature (this OR and then ID and WA still to do before 2009 319 grant awards)

Rick
